

Marinhave

Pekin Duck Producers Since 1970

About

Marinhave S.A. is a Portuguese company in the agricultural sector, based in Herdade do Arneiro Grande, in Santo Estêvão, since 1994.

It began operating in the late 1960s in “Quinta da Marinha”, with a weekly production of around 400 ducks. With steady growth and a history of trust, Marinhave has become the only company in Portugal exclusively dedicated to duck production.

The name of the company and the brand “Quinta da Marinha” refer to its geographical origin. In 1994, due to the need for expansion, the company moved from “Quinta da Marinha” to Santo Estêvão, where the current slaughtering facilities were inaugurated. These new, modern, and well-equipped infrastructures allowed Marinhave to broaden its horizons and begin its internationalization process in the commercialization of duck meat.

In parallel with meat production, Marinhave has been recycling feathers for over 40 years, through a process that includes washing, drying, dust removal, selection, and calibration, making them suitable for sale for the bedding and jacket production industry.

Growing environmental awareness, both among management and society, has led to the creation of new areas of activity. For example, the production of fertilizers. This initiative provides a sustainable use for duck by-products, such as manure and unusable feathers, transforming them into high-quality organic fertilizers.

In 2014, Marinhave built its first cooking facilities to start producing processed products, such as duck cooked products. It was the beginning of new products, such as cooked shred duck meat, confit duck legs and confit whole duck.

In 2022, Marinhave bought an existing cooking plant to expand the processed products business. The duck ready meals production for supermarkets began in these facilities. It is now a steady business, still, with a lot to develop and explore.

Marinhave’s position in the market is based, and will continue to be based, on the differentiation of the quality and excellence of its products, with the aim of meeting the expectations of its customers: the reason for Marinhave’s existence, continuity and success.
